HALF SIZES ARE ONLY AVAILABLE FOR CUSTOM SHOES

IMPORTANT - US SIZES ARE AN INDICATION ONLY

Foot Measurement:

Measuring the feet at home is done by tracing the feet on paper and measuring the length of each foot.

Gather paper (legal size is good for most adults), a pencil, and a long ruler or tape measure. Trace feet in the evening, after the feet have swollen to their maximum size. Trace feet in the hosiery that will be worn with the shoes in question.

Trace your foot and using the ruler, measure the distance from the very bottom of the heel to the top of the longest toe.

If you want to be certain to get a good fit, you should have your feet measured by a professional and use those measurements when shopping from size charts.
